

Alabama's Weekly Influenza Report

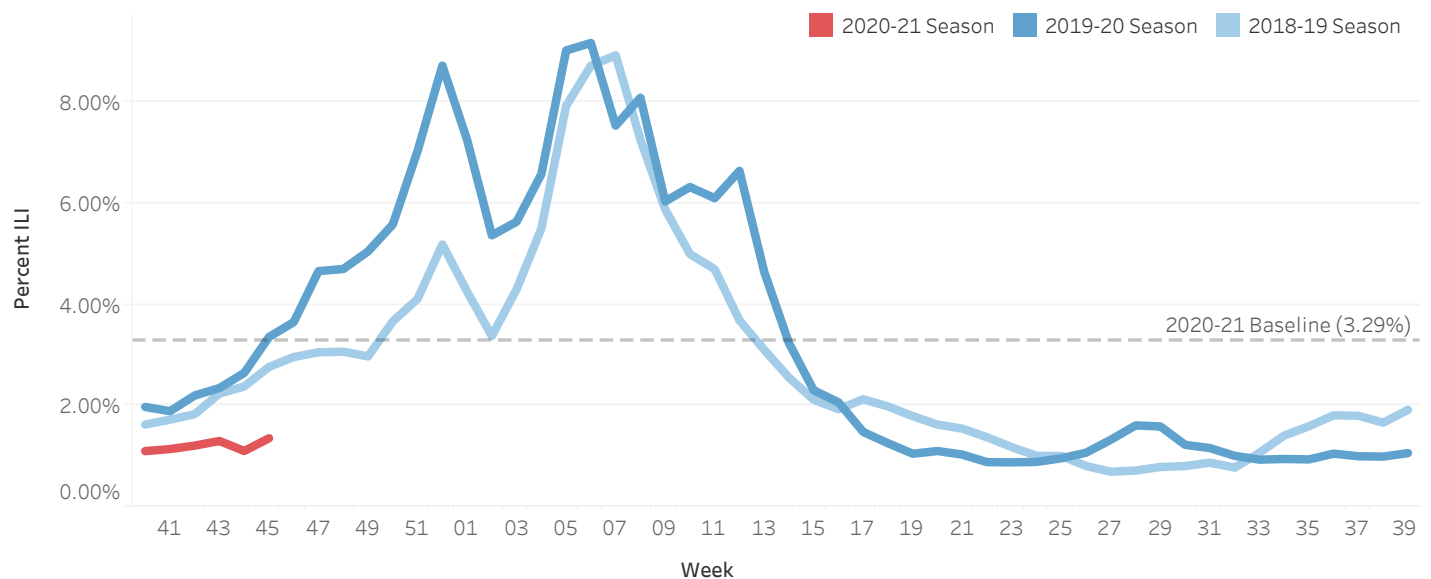

Season: 2020-2021 | Week 45: November 1, 2020 - November 7, 2020

Takeaway Points

- => Statewide influenza-like illness (ILI) is at **1.36%**, which is a **slight increase** as compared to last week. This percentage is below Alabama's 2020-2021 season baseline of 3.29%.
- => **Two districts** (Northeastern, Jefferson) have already seen **influenza B** sporadically in their communities in the last three weeks.
- => **One influenza-associated non-pediatric death** has been reported this season.
- => **No influenza or ILI outbreak(s)** were reported during the week ending November 7.
- => **Flu vaccination** can flatten the curve of flu illnesses, help protect essential workers from flu, and save medical resources for the care of patients with COVID-19.
- => It's not too late to **get vaccinated**. Flu activity is still low and CDC recommends vaccination continue throughout the fall and winter.
